# Carl Sebastian Marnewick

WEB DEVELOPER

## Profile

IT has been a way of life for me since I was 14. My grandmother had a Computer Center for scholars, which ignited my passion for IT. I aspire to some day be involved in Penetration Testing and the Security side of IT. To both prevent data breaches and solve them. Another one of my passions is development, mostly the back-end, but front-end as well. I was part of the Student Council at Belgium Campus where I worked with both disciplinary events as well as project management and event planning. This learned me how to work among a group of people, lead them and respect them.
